AREAS OF EXPERTISE

Operationally Focused Leadership

Bryan has spent a 30-year progressive career working with multinational, geographically dispersed organizations ranging in size from start-ups to \$4 billion corporations across various industries. He possesses leadership skills, and business acumen, and is a creative action-oriented strategic thinker with a genuine concern for helping the organization and its people attain their goals. Described as a charismatic team-builder who creates order from chaos, instills confidence, manages multiple functions in fast-paced environments, and uses change to continually improve operating results. A “roll up the sleeves”, “hands-on”, and “get it done” leadership style – with energy to make decisions, meet deadlines, and is never satisfied with the status quo.

M&A

Facilitate activity from due diligence through post-acquisition integration

Accounting and Finance Department Optimization

Driving increased EBITDA through operational efficiencies and increased sales across the organization. Design and develop people, processes and procedures to have a finely tuned machine
